

2004 MCM A 指纹是独一无二的吗？ 特等奖论文 教程

A 题：指纹是独一无二的吗？

人们普遍相信每个人的指纹都是不同的。请研制并分析能评估这种说法是正确可能性的模型，然后把你们在这个问题中发现的指纹识别错误率与 DNA 识别错误率相比较。

PROBLEM A: Are Fingerprints Unique?

It is a commonplace belief that the thumbprint of every human who has ever lived is different. Develop and analyze a model that will allow you to assess the probability that this is true. Compare the odds (that you found in this problem) of misidentification by fingerprint evidence against the odds of misidentification by DNA evidence.
